MEGA North America Forum 29 June 2006

MANAGING THE FEA REFERENCE MODELS

Dick Burk
Chief Architect and Manager, Federal
Enterprise Architecture Program
Management Office (FEA PMO)

AGENDA

- Architecture Principles for the Federal Government
- Citizen-Centered Services
- FEA Reference Models
- LoBs and Services
- CONOPS
- EA Assessment Framework
- Federal Transition Framework
- Making Progress

ARCHITECTURE PRINCIPLES

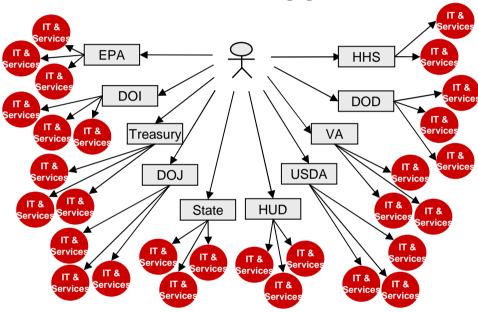

- The federal government focuses on citizens
- The federal government is a single, unified enterprise
- Federal agencies collaborate with other governments and people
- The federal architecture is mission-driven
- Security, privacy and protecting information are core government needs
- Information is a national asset
- The federal architecture simplifies government operations

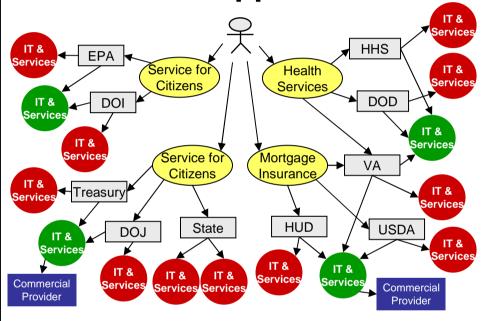

CITIZEN-CENTERED SERVICES

mega

The Historical Approach ...

The Future Approach ...

= Service for Citizens

= Agency-specific Service

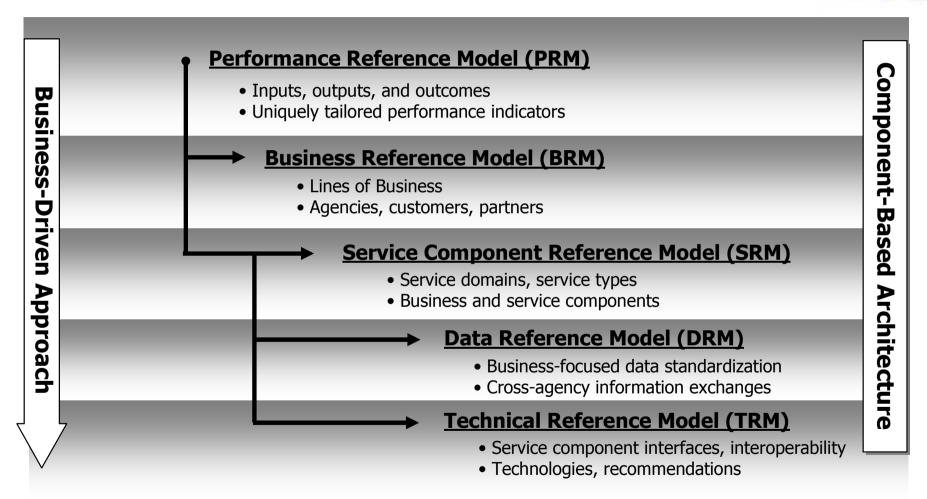

Commercial Provider = Commercial Provider

FEA REFERENCE MODELS

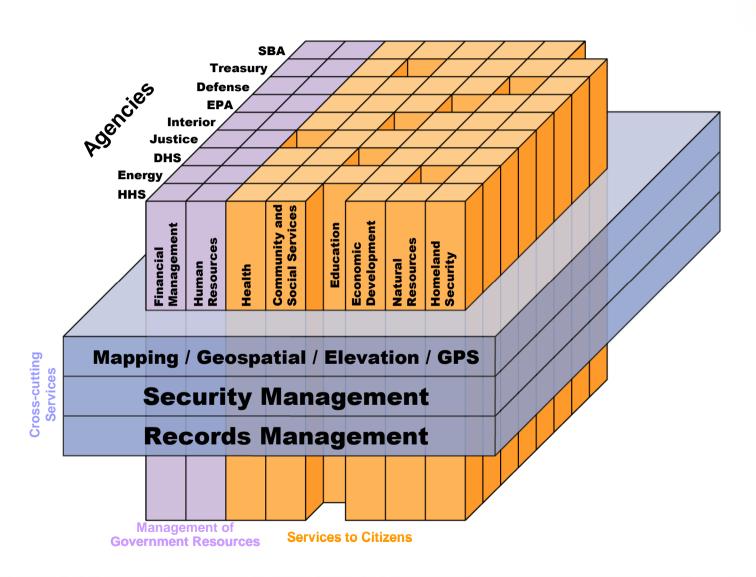

mega

LOBs AND SERVICES

CONOPS

mega

ARCHITECT

- Develop and maintain enterprise architecture
- Review, reconcile and approve segment architectures for the agency's core lines of business and common IT services

Architectural Portfolio

INVEST

Portfolio

nvestment

- Select IT initiatives to define the agency's IT investment portfolio
- Control IT investments
- Evaluate IT investments

IMPLEMENT

- Develop and maintain segment architectures
- Develop IT program management plan
- Execute IT projects

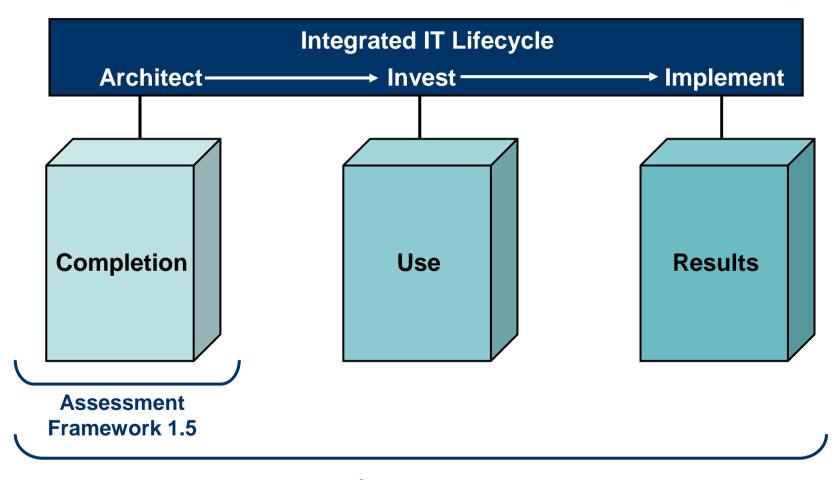

Fransition Strategy

END-TO-END GOVERNANCE

EA ASSESSMENT FRAMEWORK

mega

Assessment Framework 2.0

FEDERAL TRANSITION FRAMEWORK (FTF)

mega

What it is...

- A single information source for government-wide IT policy objectives and cross-agency initiatives, including
 - OMB-sponsored initiatives E-Gov initiatives, LoB initiatives
 - Government-wide initiatives IPv6, HSPD 12
- A simple structure to organize and publish existing information
- Three documents
 - FTF Usage Guide
 - FTF Catalog
 - FTF Meta-model Reference

What it isn't...

Does not define new government-wide IT policy or strategy

FTF BENEFITS

Goals

- Increase the **alignment** of agency enterprise architecture with federal IT policy decisions or other forms of official guidance
- Increase sharing and reuse of common, cross-agency business processes, service components and technology standards
- Increase collaboration through agency participation in cross-agency communities of practice

Agencies can

- Get more consistent, complete, and detailed information about cross-agency initiatives more quickly to inform their enterprise architecture, capital planning, and implementation activities
- Use that information to make more informed decisions about their IT investments
- Improve the effectiveness (i.e., performance) and efficiency (i.e., cost and schedule) of their IT investments

FTF PACKAGE

FTF Usage Guide

- Provides guidance to agency decision-makers and cross-agency stakeholders on how to apply and extend the FTF
- The first document to read when getting started with the FTF

FTF Catalog

- Provides information on cross-agency initiatives included in the FTF
 - Published in both PDF and XML formats (XML for 1.0 release)
- Pilot release will include IPv6, IT Infrastructure LoB, and E-Authentication
- Version 1.0 release will include additional 14 cross-agency initiatives

FTF Meta-model Reference

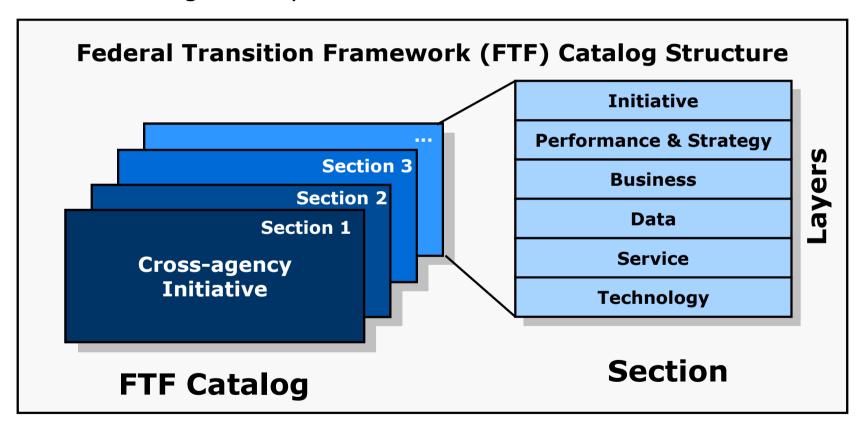

- Provides information on the internal structure of the FTF
- Provided as a technical reference for architects

FTF CATALOG STRUCTURE

mega

- FTF Catalog is organized into sections
- FTF Catalog will be published in both PDF and XML format

FTF TIMELINE

- FTF Pilot Version to be released shortly
 - FTF documents will be posted on <u>www.eqov.qov</u>
- Release of FTF Version 1.0 on September 1st
 - Updated FTF Version 1.0 documents posted on www.egov.gov
- Updated versions of additional FEA documentation also released on September 1st
 - Consolidated Reference Model
 - EA Assessment Framework
 - Cross-Agency CONOPS

MAKING PROGRESS

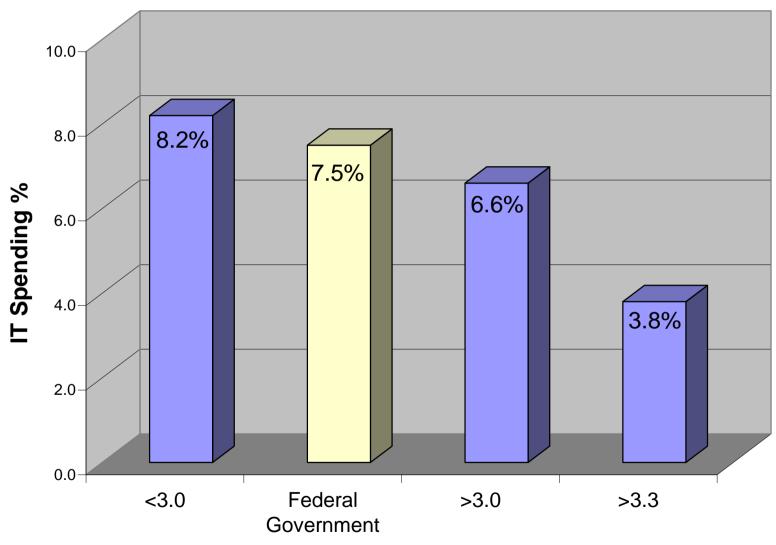

- The FEA and E-Gov initiatives are helping to control growth in Federal IT spending and encourage more efficient IT investment practices among agencies.
- At the same time, there is evidence that customer satisfaction with Federal IT remains high.
 - For example, a recent (June 2006) ACSI (American Customer Satisfaction Index) study shows customer satisfaction at an alltime high for Federal web sites.
