

Service Oriented Architecture (SOA) Education Program

Web Age Solutions is a leading provider of technical training to The Fortune 500 and Global 1000. We earned our “Preferred Vendor” status with these global leaders as a result of our highly progressive approach to technical training.

Our Courseware

Regarded as relevant, informative, and comprehensive, the content of Web Age’s courseware is second to none. Whether providing a subject overview, technology workshop, or in-depth technical bootcamp, Web Age provides world class educational content. Every Web Age course utilizes a variety of teaching mediums to reinforce new information, including annotated courseware, group discussions, instructor demonstrations, and hands-on lab work.

Our Instructors

Web Age employs industry experts (authors, conference presenters, practitioners, etc.) and seasoned educators to conduct our training engagements. Our instructors bring a blend of academic expertise and real-world project experience into the classroom. This ensures that students learn both the theory and practical application of new concepts and technologies.

Our Process

If training were a commodity, you could buy it off the shelf at your local department store. We don’t believe that effective training can be delivered without understanding an organization’s business drivers, existing systems and methodologies, and a clear vision for where they are headed. To that end, we work closely with each client to understand where they are coming *from* and where they want to go *to* as an organization. By leveraging a huge library of professional, technical, and hands-on curriculum, we are able to quickly and cost-effectively deliver custom training solutions to meet the unique needs of our clients.

Service Oriented Architecture

Service Oriented Architecture provides a more agile and comprehensive way to integrate information systems and businesses processes than traditional integration approaches. Companies need to re-skill their staff, however, in order to take advantage of this new methodology.

Our SOA knowledge-transfer engagements cover a broad range of job roles, including Architects, Developers, Business Analysis and various levels of technical and business management.

At Web Age Solutions we know what it takes to be successful with SOA. More importantly, we understand the learning process and adoption stages associated with SOA. This has driven us to create a full range of SOA training and mentoring services from single courses, to full learning paths, to blended training and mentoring engagements. We want to be your SOA partner to ensure your success in whatever capacity you may need.

SOA Training by Role

Don't let the 'A' in SOA fool you. SOA impacts more than just Architects. High-level training and detailed re-skilling is required for various technical and business roles within the enterprise.

All Audiences

- Introduction to SOA (WAI405)
- Implementing SOA Governance (WAI508)
- XML and Web Services (WAI075)

Architects

- SOA for Architects (WAI471)
- Mastering Service Oriented Analysis and Design (WAI477)

Auditors

- SOA for Auditors (coming soon)

Business Analysts

- Mastering Service Oriented Analysis and Design (WAI477)
- Business Process Modeling (WAI516)
- Tool Specific Business Modeling Training (IBM, Microsoft, Eclipse, etc.)

Developers

- SOA Immersion Bootcamp (WAI362/I533)
- Testing SOA Applications (WAI395)
- Tool Specific SOA / ESB / Web Services Training (IBM, BEA, Oracle, Microsoft, Apache, etc.)

Executives

- SOA for Executives (WAI548)

Managers

- SOA for Managers (WAI470)
- Business Process Modeling (WAI516)

Quality Analysts / Testers

- Testing SOA Applications (WAI395)
- Tool Specific SOA Testing Training (Parasoft, IBM/Rational, JMeter, etc.)

For more details, click on any course title.

SOA Education Tracks

Whether your organization is in the early stages of SOA exploration, or well into an existing SOA implementation initiative, Web Age has an education track for you.

Discovery Track (5 courses) – Exploring, understanding, and evaluating the potential of SOA

Strategy Track (4+ courses) – Crafting a strategic SOA vision and reference architecture

Application Track (4+ courses) – Designing, implementing and deploying SOA

Optimization Track (3 courses) – Refactoring, improving, and modifying an existing SOA

For more details on any of the above tracks, you can click on the track name.

Custom SOA Learning Plans

Many of our clients find that they require a modified version of one or more of the job role training plans or SOA education tracks. At Web Age we believe in collaborative consulting. We work closely with our clients and their subject matter experts to craft custom training plans that address the unique challenges and opportunities that exist with the client's organization.
